PROJECTS

HOSPITAL MANAGEMENT SYSTEM

- **Developed a user-friendly interface** using React framework, improving ease of use for medical staff and administrative personnel.
- **Managed databases** using MySQL/PostgreSQL for efficient storage, retrieval, and management of hospital and patient records.
- **Implemented CRUD operations** to handle patient records, appointments, billing, and other essential hospital data.

PORTFOLIO

Built a dynamic user interface using modern frameworks like **React-JS**, enhancing the interactivity and smooth navigation of the website.

E-COMMERCE WEBSITE

📅   📍

Designed and developed an intuitive, responsive user interface for the e-commerce platform using **React.js**

- **Integrated a scalable database** (MySQL / PostgreSQL / MongoDB) to manage large datasets, including customer details, product inventory, and transaction records.
